

## An Accredited Organization

BSI is accredited to deliver assessment services to a variety of standards. Accreditation by an authoritative body, such as the ANAB and SCC gives a certification body, such as BSI, formal recognition that demonstrates our capacity in carrying out specific tasks, providing assurance to its customers that it continues to operate according to internationally-accepted criteria. Our accreditation to 17021 demonstrates that we are accredited to the highest level of competency.

## Our Industry Approach

BSI provides comprehensive solutions for a variety of industry sectors based on industry-specific standards. This approach allows us to provide our clients with integrated solutions based on their specific needs.

## Unique Audit Experience

BSI Management Systems is one of the few registrars that still employs full-time auditors. In fact, 80% of BSI audits are conducted by full-time staff. Why is this? We feel this level of stability is vitally important in our mission to provide you with the most highly-trained and competent auditors possible. We strongly believe in placing great emphasis on auditor capability, and by providing our clients with the best auditors available, we can ensure our clients receive the best possible audit experience.

Additionally, by employing full-time auditors, we can better ensure that you and your organization are able to develop deeper working relationships with your auditor, ensuring you maximize your management system's effectiveness.

BSI's auditors undergo a rigorous training, review and approval process, and are required to take monthly training sessions designed to enhance their skills and technical ability as well as keep them informed of recent developments. Finally, all BSI auditors are required to undertake a full peer review every three years to retain employment with BSI.

We understand that quality of our audit staff and overall quality of the audits are what matter most to you and your organization, and BSI's commitment to assessment staff training is second to none in this industry.

## Registration Services

By implementing and registering an integrated management system, an organization is better able to achieve continual performance improvement through the development of more efficient methods and system operations. Utilizing a proven management system combined with ongoing external validation tools enables the organization to continually renew its mission, strategies, operations, and service levels.

## Benefits of Registration

- Builds stakeholder and customer confidence by demonstrating commitment to using industry-respected practices and ensuring effective business operations
- Commitment to your organization and customers demonstrates your brand promise in your industry
- Increases market opportunities as customers see your organization as best in class
- Improves performance and demonstrates a proactive approach through continual improvement of processes
- Improves staff responsibility, commitment, and motivation resulting in better performance
- Best practices and auditor experiences accelerate process improvement and cost reductions
